Jérôme Peyronnet

Contemporary Art

Jérôme Peyronnet, art craftsman, designs **contemporary paintings**. Through his original creations, he combines **design and contemporary art**. His objective: to allow you to create unparalleled interiors. His paintings are an invitation to **calligraphy revisited** and **minimalism**.

In his calligraphies, he questions our way of writing in the digital age. What if this gesture was on the way out? Writing and drawing by hand is a way of defending a skill. Will we know how to write in 20 years? **Writing is a way of giving of oneself.**

According to him, it is important to safeguard the practice of our writing. **The epistolary link** is always **stronger than a text message**. It is an art, a manual art.

In his modern minimalist paintings, the **harmony of the colours** and the **precision of the lines** are there. Methodical and rectilinear. He works on **nuances, reflections** and **oscillations**.

The superimposition of layers of paint gives the material a different content, a new colour.

Each line catches the **light**, and the effect of transparency is exciting.

**An (al)chemistry**
